Dear Customer,

Here are the results of the inspection at 320 Carpenters Ln, Muncy PA 17756. The DE filter and pump looked and sounded good. Water level was at normal running level. It is a concrete/fiberglass pool no liner. Visible patches inside pool but appears to be holding the water. Patches are not necessarily an issue. The steps & coping around pool looks good. Safety winter cover appears to be in good shape. The plumbing aboveground looked good no leaks at the time. Pressure checked return lines and skimmer underground and they checked out good. Some uneven concrete around pool not a structural issue. This is not a guarantee as to how long anything will last.

Thank you for your business,

Fagnano's Pools
